

## Fall Update from Operations

### Irrigation:

The irrigation system is currently off due to a break underneath the irrigation building. Special equipment is needed to excavate under the building to find where the leak is coming from. Operations is hoping to have the system running before freezing temperatures set in.

Operations will shut down the system once overnight temperatures reach -5 or over night temperatures stay below freezing. A notification will be sent out once we find if the break can be repaired this season or not.

### Seasonal Residents:

If you are needing your potable water system turned off for the winter, please contact Fred Fehr @ 306-492-7922. Operations will pull all outside meters and meters that are in green boxes when temperatures drop to the -5 or temperatures stay below freezing for a consistent number of days. Otherwise, operations will pull all meters after the October long weekend. If you wish your meter to stay in after this point, it is the responsibility of the resident to contact Operations staff to take your meter out and turn your water off. If your meter is inside your dwelling or in a crawl space, it is the responsibility of the resident to contact Operations or the Village Office to set up a time for the Operations staff to enter the property and assist in having the water turned off.

### Fiber Optics:

The main line through Shields is now underway. Expect disruptions along alley way's and road way's. There will be areas along road allowance that will be dug up to facilitate fiber infrastructure. A small box will be placed in the ground at every second house. This box will be the feed to the properties. Each box will feed two properties. Please respect all markers along property boundaries as pulling them out will delay the project.

### Golf Course:

The golf course will be closing October 14<sup>th</sup> or 15<sup>th</sup> depending on the wind. Even though tarps are not on the greens please stay off as they need to be sprayed to help resist disease over the winter. Please do not go on the greens during and after these dates.

### Winter Road Preparations:

Winter will be coming and with it snow clearing on roads and alley's. Please assure both garbage and recycle bins are pulled off road allowance to assist in snow clearing. Please assure that all personal trailers and personal property is not stored on road allowance as this to can interfere in road clearing and runs the risk in damaging your property as well as snow clearing equipment.

Thank You,

Operations Staff
